them, the abstract must conform to IMRYD format (introduction, method,

reviews do not.

This paragraph meets the requirements, as we can see the 200 words

10, which is equivalent to Times Roman, size 12. It is used because it is the corporate font of USIE and is free of copyright,

I have added this text on university inspection simply as a filler, as an example of the maximum space the summary can occupy. The educational inspection intervenes on all the elements and aspects of the educational system, and forming part of it are the university teachings, although these are regulated by their specific rules. At this moment once the distribution of competences between the State and the Autonomous Communities has been made.

Key words: First with capital letters, next lower case, lower case, lower case, lower case, lower case. NO MORE than 7 and no less than 4. In italics.

Preference is given to keywords that follow the format established by UNESCO that include a number and the descriptor, example: 580202 Organization and management of educational institutions.
